

THE Cane-line Weave ®

Cane-line Weave® is a fibre made of dyed and hard-wearing polyethylene. Its water-resistant features make it withstand large temperature differences and excellent for outdoor use. The structure of the fibres and the weave provide flexibility and optimum comfort. This material is hard-wearing and UV-resistant and is overall maintenance-free. Weave® is made to withstand weather conditions all over the world and the material maintains its colours and shape for years on end.
